

Project Uber Eats Advertisements

BROWN
PRODUCT
MANAGEMENT

Executive Summary

Project Goal

Increase adoption of Uber Eats Ads by addressing the top barriers for restaurant owners: lack of trust in ROI, limited control, and high mental load. Our redesign introduces transparency, flexibility, and intuitive flows to make ads feel predictable, low-risk, and aligned with business goals.

User

Independent restaurant owners and franchises who rely on delivery platforms for revenue but need marketing tools that are simple, trustworthy, and effective.

Core Pain Points

1. **Low Confidence in ROI**
2. **Lack of Control** – Limited ability to target the right audience or schedule ads
3. **Mental Load** – Setup feels complex and owners want intuitive campaigns.

Core Solution Proposals

1. **Flexible Campaigns** – Simple vs Advanced
2. **Transparent ROI** – Look into how Uber calculates ROI estimates + detailed analytics
3. **Advanced Controls** – Targeting by demographics, scheduling, and heatmaps.

North Star

Increase proportion of users that adopt Uber Eats Ads

Agenda

1. Problem Space

2. Users & Pain Points

3. Goals & Success Criteria

4. Recommendations

5. Prototype Demo & Prioritization

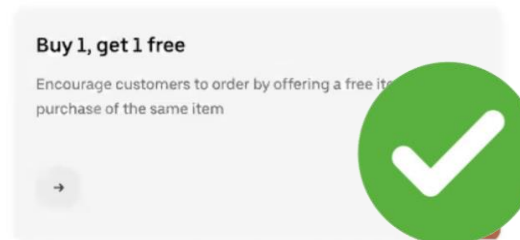

Merchants use Uber Eats Delivery. But they don't use Uber Eats Ads

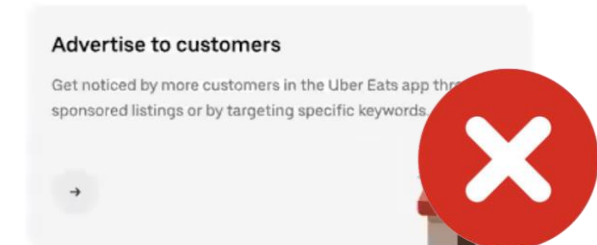

As Uber Eats continues expanding its advertising offerings, optimizing small restaurant and franchise engagement with in-app ads presents a **critical strategic opportunity**.

Currently, despite **Uber Eats Marketing's growing adoption**, **Uber Eats Ads adoption has been stagnant**. Specifically, we see a growing disparity in adoption between Uber Eats Offers and Uber Eats Ads:

Offers

Ads

This project aims to uncover the **motivations, pain points, and behaviors of merchants who do or do not use Uber Eats Ads**. By better understanding how restaurant owners interact with and perceive Uber's ad tools compared to other platforms, Uber can improve adoption, product design, and overall advertiser ROI.

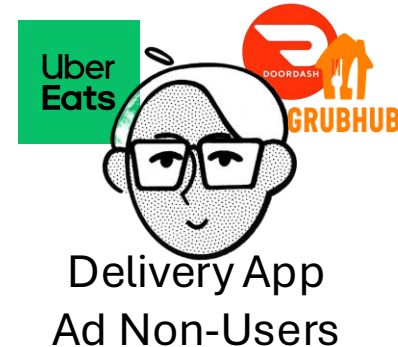

Restaurant owners currently use a range of marketing solutions

Platform/Feature		Native Ad Solutions	Off-Site Ad Solutions	Customer Targeting	Pricing
UberEats		Sponsored Listings/Keyword targeting	Uber ecosystem	By type of customer (New, existing, retargeting), by day and time of day, and by order type (small vs big)	Pay-per-click
Doordash		Sponsored Listings and off-app advertisement for supermarket products.	Yes, across Meta, TikTok, Pinterest, Google Ads (Only for supermarket and store products)	Same as Uber Eats + Smart Targeting ("most valuable customers for your business")	Pay-per-order
Instagram		Boosted posts, reels	Facebook/Meta ecosystem	Algorithmic targeting focused on person's interests or personas	Custom pricing depending on reach
Google		Search, display, video	Google Products	Keywords, demographics, and device	Cost per click and cost per thousand
Fantuan		In-app banners, WeChat/RED Vlogs	RED & WeChat cross-posting	City-level + WeChat audiences	Set price per ad

Structured research approach – from broad insights to deep user experience

We segmented our research process into the following steps:

1. User Segmentation of SMB & Franchises

2. Interview Methods

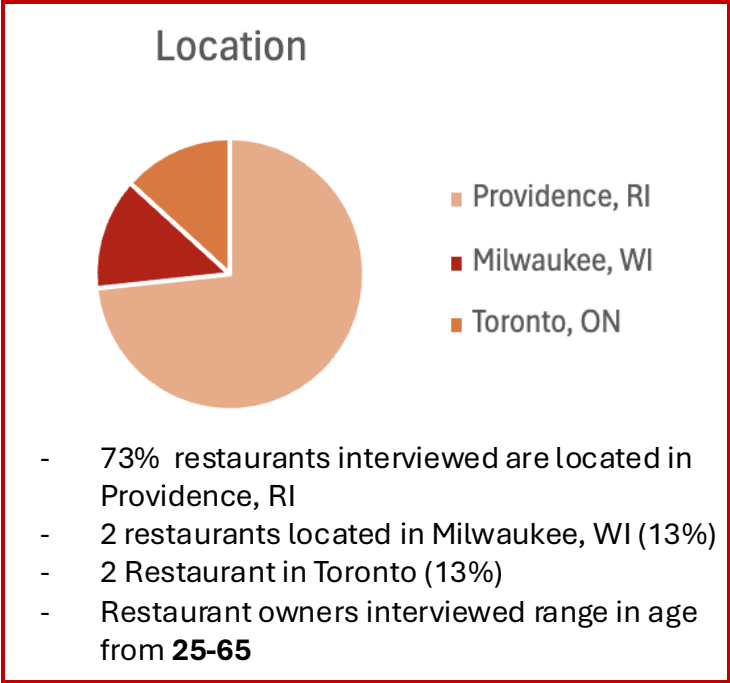

- **Phase I Interviews – High Level Understanding**
 - Outreach to 300+ restaurants across the US through Email, Phone, In-person, Word-of-mouth etc.
 - Conducted initial interviews to understand the pain points and motivations that restaurant owners have with advertising and marketing
- **Phase II Interviews – Low Level User Experience Insights**
 - A/B testing of UEM and UAM to get insights on how the user experience can be improved.

15 restaurants interviewed: mostly small & local with diverse owners

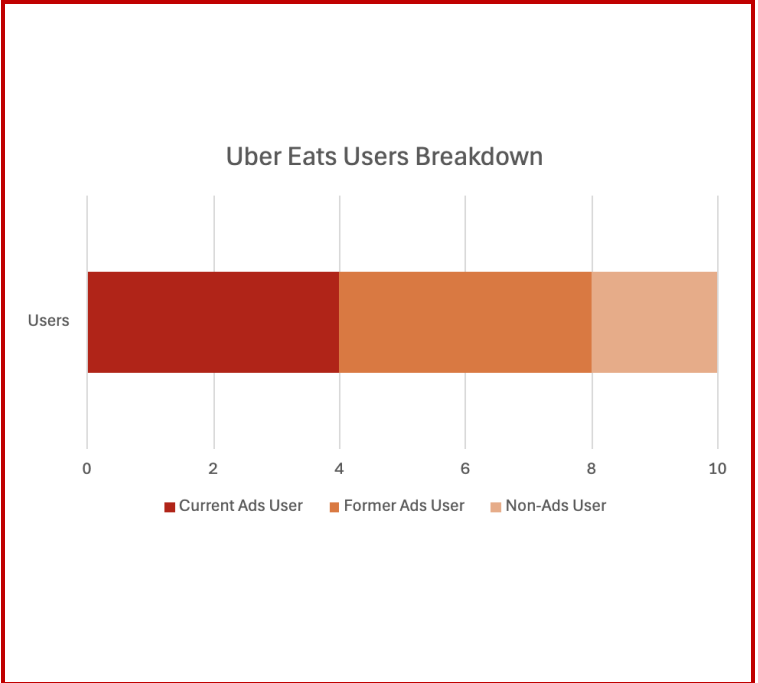

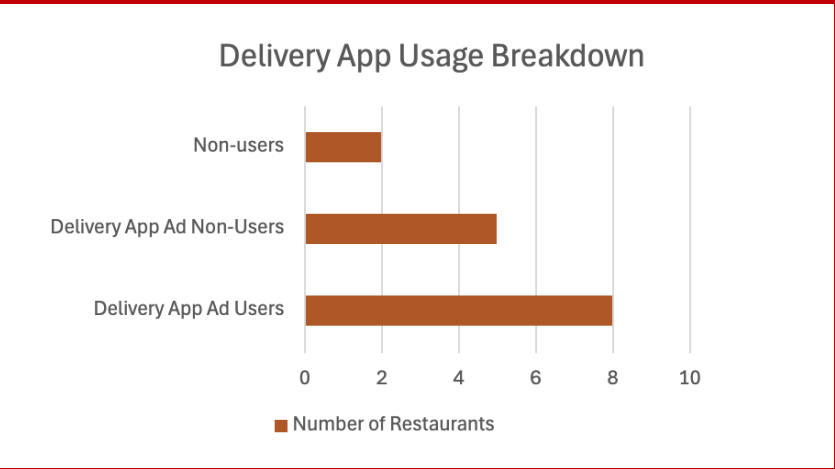

General Context

15 Restaurants with fewer than 40 locations were interviewed, with most being from Providence, RI.

Our interviews accounted for many different types of restaurants, including American diner style, noodle places, and bakeries. The differences in our user segmentation included the age range of the restaurant owners, varying from 25 to 65, and reliance on delivery platforms. These differences likely result in variation in findings.

Statistics: What key numbers help define our interviewees?

Agenda

1. Problem Space

2. Users & Pain Points

3. Goals & Success Criteria

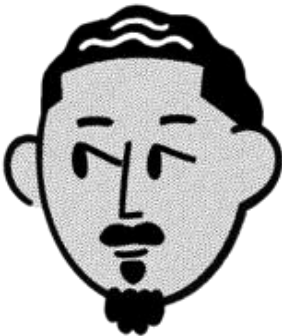

4. Recommendations

5. Prototype Demo & Prioritization

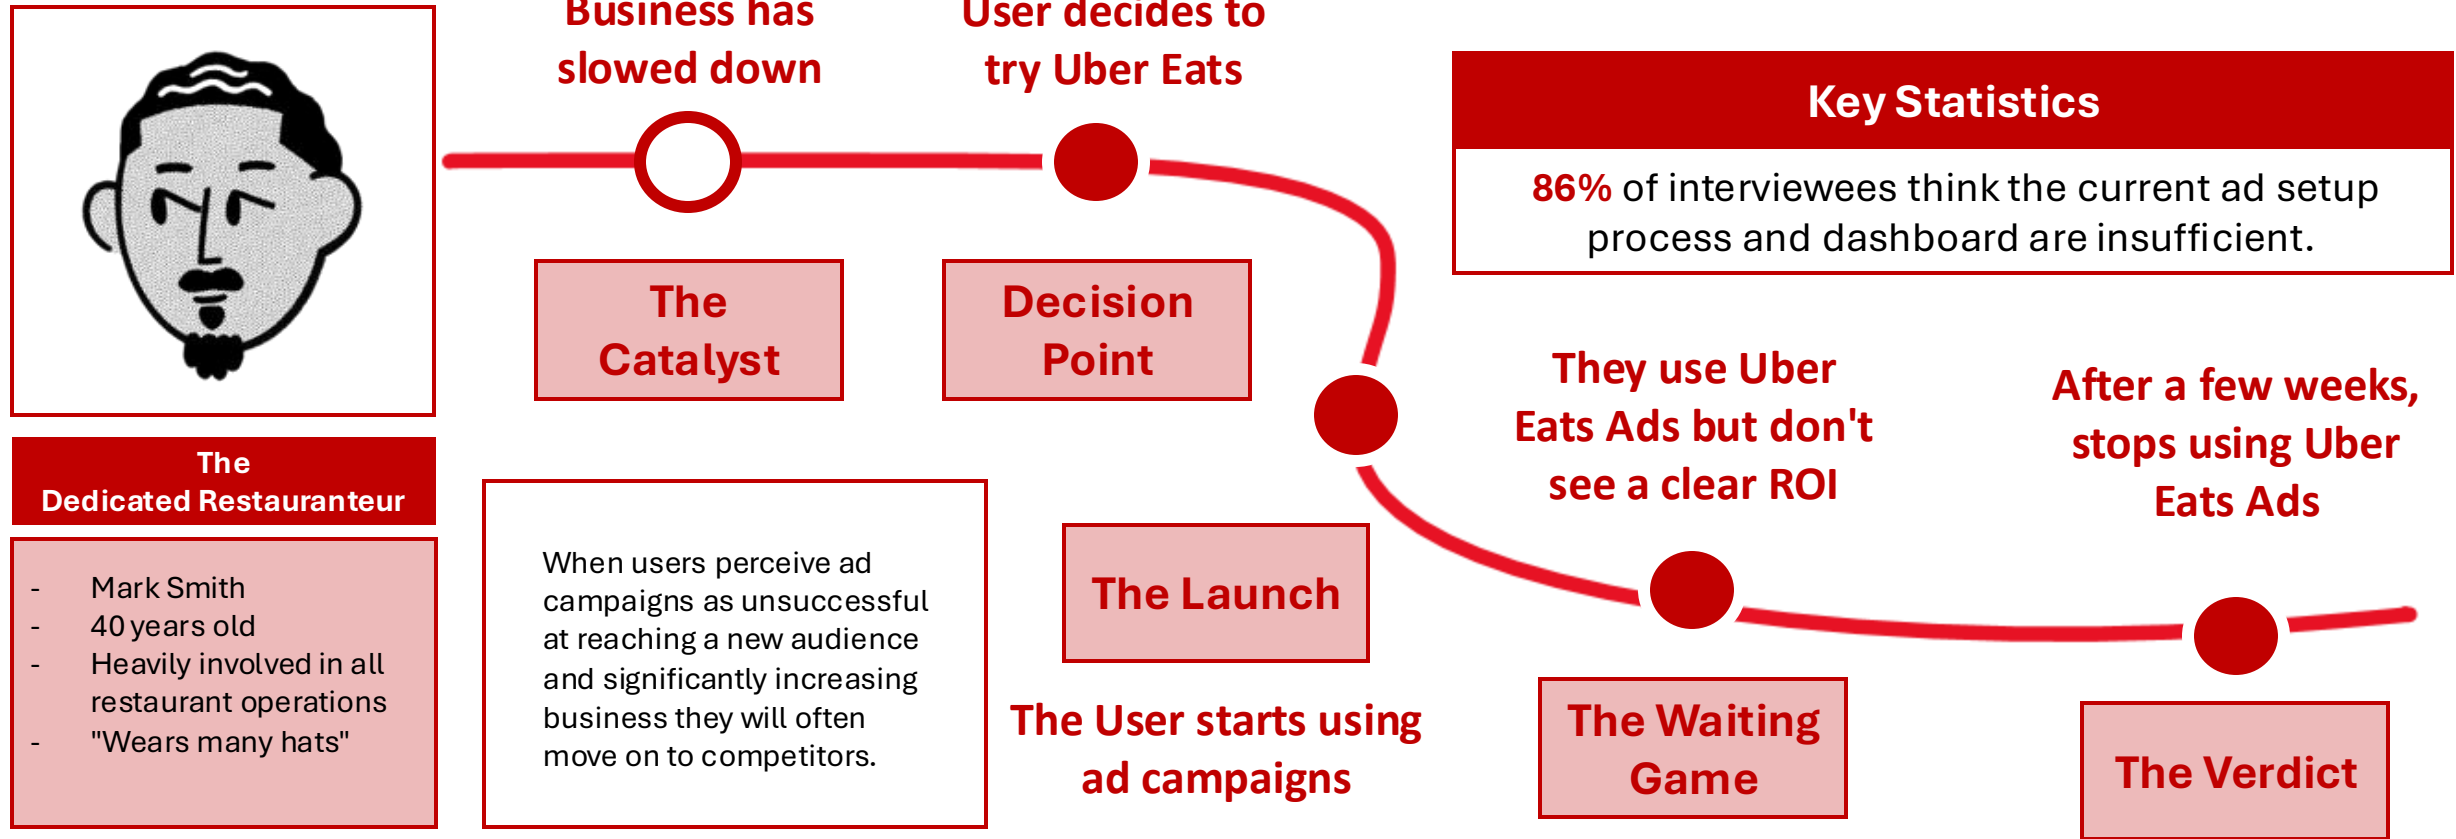

Users want better value out of Uber Eats Ads

Background Context

Users interviewed varied in demographics. This persona encompasses major themes that emerged from our interviews.

The Dedicated Restaurateur	Goals	Takeaways
	- Sustainable, measurable restaurant growth - Use apps to generate foot traffic/retain customers	- Mark wants to be a partner, not just a transaction - He needs intuitive ad creation tools that prove their worth, or he will revert to a competitor who appears to offer more control/better results - While using delivery apps, his main goal is to create a lasting impression on users and increase in-person foot traffic
	Motivations	
	- Wants to better understand his customer base to improve marketing and increase sales - Wants to spend only as much as is worth the ROI	
- Mark Smith - 40 years old - Heavily involved in all restaurant operations, "wears many hats"	User Stories	
	- "I'm busy running my restaurant so I don't have a lot of time to dedicate to managing complex ads" - "I helped found this restaurant, so I'm dedicated to making it thrive, but I need clear results from ads platforms"	

Highly dedicated restaurant owners want a greater stake in the ad campaign process and need to see clear progress for retention.

To become the first-choice ads delivery platform, Uber Eats will need to offer a clearer interpretation of metrics and provide more autonomy, especially to experienced restaurants that are highly interested in improving their businesses. Clear metrics will make owners more inclined to believe in the success that Uber Eats Ads brings.

Pain Point 0: Low satisfaction with Uber Eats as a platform

Key Findings

1. Variability in driver reliability and service quality directly impacts customer satisfaction and repeat business. [1]
2. Lack of customer support from Uber Eats makes users turn to competitor platforms. [2]
3. The perception that Uber Eats has less users than competitors like DoorDash deters ad spend. [3]

85.3% of interviewees reported at least some level of dissatisfaction with the Uber Eats Experience

Quotes

[1] "In my experience, Uber Eats has messed up [our orders]. Their drivers have also caused some problems for us, so I'm less inclined to use the platform." - Hui's Cantonese

[2] "I've seen less customer support with Uber compared to other platforms. When a customer cancelled an order after we already made it DoorDash compensated us, but Uber wouldn't."
- Hui's Cantonese

[3] "DoorDash has more users thanks to its loyalty program. We use DoorDash because we can reach a wider audience with our ads compared to Uber Eats." - Y Noodle & Bar

Pain Point 1: Low confidence in ROI - "I don't trust the value"

Key Findings

1. Ads feel like a black box — no visibility into where they appear or how they perform [2]
2. 30% commission + pay per click (PPC) makes spending feel risky [2]
3. Skepticism toward estimated metrics + upsell prompts [1, 3]
4. Trust increases only when tied to their own history or human guidance [3]

93.3% of interviewees were skeptics towards ROI after using Uber Eats Ads

Quotes

[1] "I don't trust the recommendations because I think they're just trying to get me to spend more money on their platform." - Duke's Bakery

[2] "I don't really see a return on how much I'm spending. Maybe sales increase a bit, but the amount I'm spending [on the ad] doesn't translate to a great enough improvement." - Zinneken's

[3] "I only trust the recommended prices because I've tracked and tested them myself. To me, the next steps recommended on the end screen are just a money grab, though." - Pazi's Place

Pain Point 2: Lack of control over audience and outcome - "I wish my ads could do more" *Prevalent in marketing-savvy restaurants

Key Findings

1. Social media is free, while offering creative control and gives detailed and real feedback [1]
2. Ads are only appealing when:
 - Targeting is very relevant (dietary needs, neighborhoods) [1]
 - They drive repeat customers and in-person visits [3]
 - They match operations (e.g., boosting slow hours) [2]

64.2% of interviewees stated they "lacked control over the setup and metrics process"

85.7% of interviewees wish they had more control over the ad setup process.

Quotes

[1] "I know who my customers are since I serve specific dietary needs, but I have no way of targeting my ads towards them. My own social media promotion reaches them better." - Dibs Scratch Bakery

[2] "Our restaurant is a diner, so we get much less foot traffic at certain times of the day. I would love to be able to bring in more customers during slower hours." - Pazi's Place

[3] "I would love to know more about who my customers are. The goal of my ads is to get people into the restaurant to give them an even better experience and get them to repeat [buy]." - Pazi's Place

Pain Point 3: Mental load outweighs expected reward - "I want a clear and straightforward ad campaign management workflow" *Prevalent in less marketing-savvy users

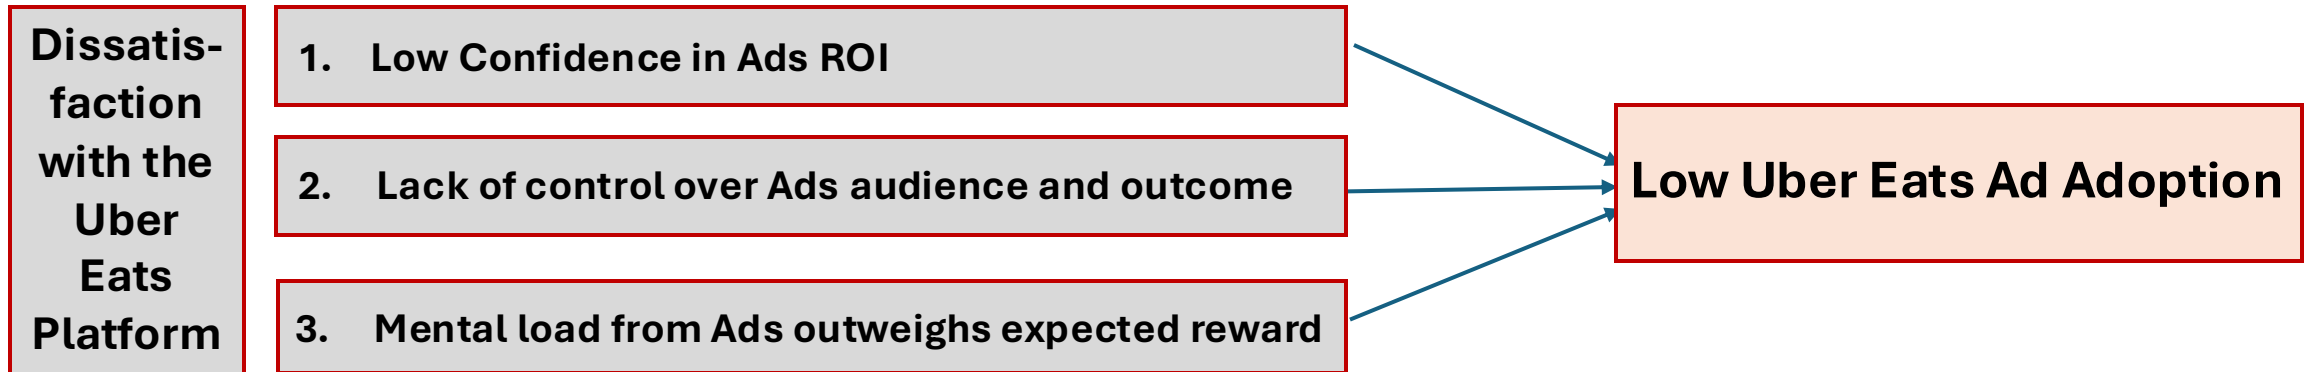

Key Findings	Quotes
1. Owners are stretched thin running every part of the business [1, 2, 3] 2. Don't want to learn ad jargon or tweak settings [1] 3. Want one-step, set-and-forget campaigns [1, 3] 4. If they tried before but didn't see payoff, they won't return [2] 66.7% of interviewees felt a mental load due to the complexity of the platform when setting up ads.	[1] "I don't really have time to go through such a complex campaign or look into what every metric means. I just want a clear and easy way to set up [ads] and grow my business." - Hometown Poke [2] "I've tried Uber Eats Ads for a while, but even after tweaking [campaigns], I didn't see a huge result. Ads became unsustainable for my businesses since I'm the only one managing them." - Y Noodle & Bar [3] "I'm the only one running the restaurant, so I still have to prioritize our in-person customers. I thought ads would be a good way to supplement our revenue, but it's hard to keep up [with the ads]." - Tangled Noodles

Agenda

1. Problem Space
2. Users & Pain Points
3. Goals & Success Criteria
4. Recommendations
5. Prototype Demo & Prioritization

North Star: Increase proportion of users that adopt Uber Eats Ads

Based on our interviews, the 3 main areas of pain points restaurant owners were facing are:

Therefore, owners don't use ads because they **lack trust, time, and control**. We hypothesize an increase in adoption when owners start to **see value, save effort, and reach the right diners**.

North Star: Increase proportion of users that adopt Uber Eats Ads

Pain Points 1 & 2 (low ROI & control) Supporting Metrics:

- Ad sales growth per merchant
- Ad retention rate
- CSAT & NPS

Pain Point 3 (ease-of-use) Supporting Metrics:

- Time to first campaign launch
- Ad campaign completion rate (# of ads completed vs started)

Agenda

1. Problem Space
2. Users & Pain Points
3. Goals & Success Criteria
4. Recommendations
5. Prototype Demo & Prioritization

Addressing platform frustrations to enable ads adoption

Pain Point 0: Low satisfaction with Uber Eats as a platform

Recommendations

1. Improve merchant support

Faster resolution times and transparent steps for escalating complex issues.

2. Improve delivery quality

Greater driver consistency to improve overall reliability.

3. Grow user demand

Introduce loyalty or rewards programs to expand the user base and increase order volume.

Merchants won't adopt ads until ROI feels real and trustworthy

Pain Point 1: Low Confidence in ROI - "I don't trust the value"

Recommendations

1. Clarify ROI methodology

Provide clear explanations of how estimates are calculated.

- Explore ghost ads: show merchants how their sales would look without the campaign to highlight ad impact.

71% of interviewees were skeptical about Uber's ROI sales estimation

2. Add flexible pricing models

Include Pay-Per-Click, Pay-Per-Conversion, and Pay-Per-Impression options to tie spend directly to outcomes.

59% of interviewees showed interest in a Pay-Per-Conversion option

Average Daily Budget

\$11 per day

Estimated \$375/week sales from ads. [See how we got this estimate.](#)

Payment Method

- ☐ Pay per click
Pay only when someone clicks on your ad.
- ☒ Pay per conversion
Pay only when someone places an order.
- ☐ Pay per impression
Pay per 1,000 views of your ad. Best for brand awareness.

Giving merchants more control directly increases confidence in ads

Pain Point 2: Lack of control over audience and outcome - "I wish my ads could do more"

Recommendations

1. Offer flexible campaign modes

- Simple Mode: streamlined setup.
- Advanced Mode: granular scheduling and targeting options.

46% prefer simple mode
54% prefer having the choice of advanced mode

Choose your campaign mode

Simple

Create an ad to grow your sales and get discovered by more customers.

Advanced

Advanced settings give you full control over targeting and scheduling.

2. Expand targeting capabilities

Ad timing, demographic, customer frequency, and dietary preference targeting.

62% of interviewees preferred advanced customer targeting

Target your audience

Reach the right customers with precise targeting options

Customer type

☐ All customers

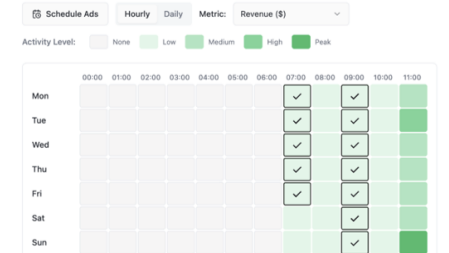

Show your ad to everyone in your delivery area

☒ New customers

Focus on customers who haven't ordered from you before

Times

Select the times your ad will run for. Use the heat map data to view metrics broken down by hour.

3. Metric-driven ad scheduling

Hourly ad timing with visualized customer behavior (views, revenue, orders) layered over the scheduler.

80% of interviewees liked advanced scheduling/heat map controls

4. Provide a user analytics dashboard

Clear performance insights to support informed decision-making.

86% of interviewees think the current dashboard is insufficient in terms of analytics and/or clarity.

**BROWN
PRODUCT
MANAGEMENT**

Ad management that fits every level of merchant experience

Pain Point 3: Mental load outweighs expected reward - "I want a clear and straightforward ad campaign management workflow"

Recommendations

1. Guided, step-by-step campaign flow

Guides merchants through setup and management, ensuring they can confidently launch campaigns.

Metrics Dashboard

User Analytics

A separate tab that creates a more detailed breakdown of user demographics and an ideal user profile.

Daily/Hourly Heatmap

Highlights daily engagement trends, peak activity hours, and time-specific revenue at a glance.

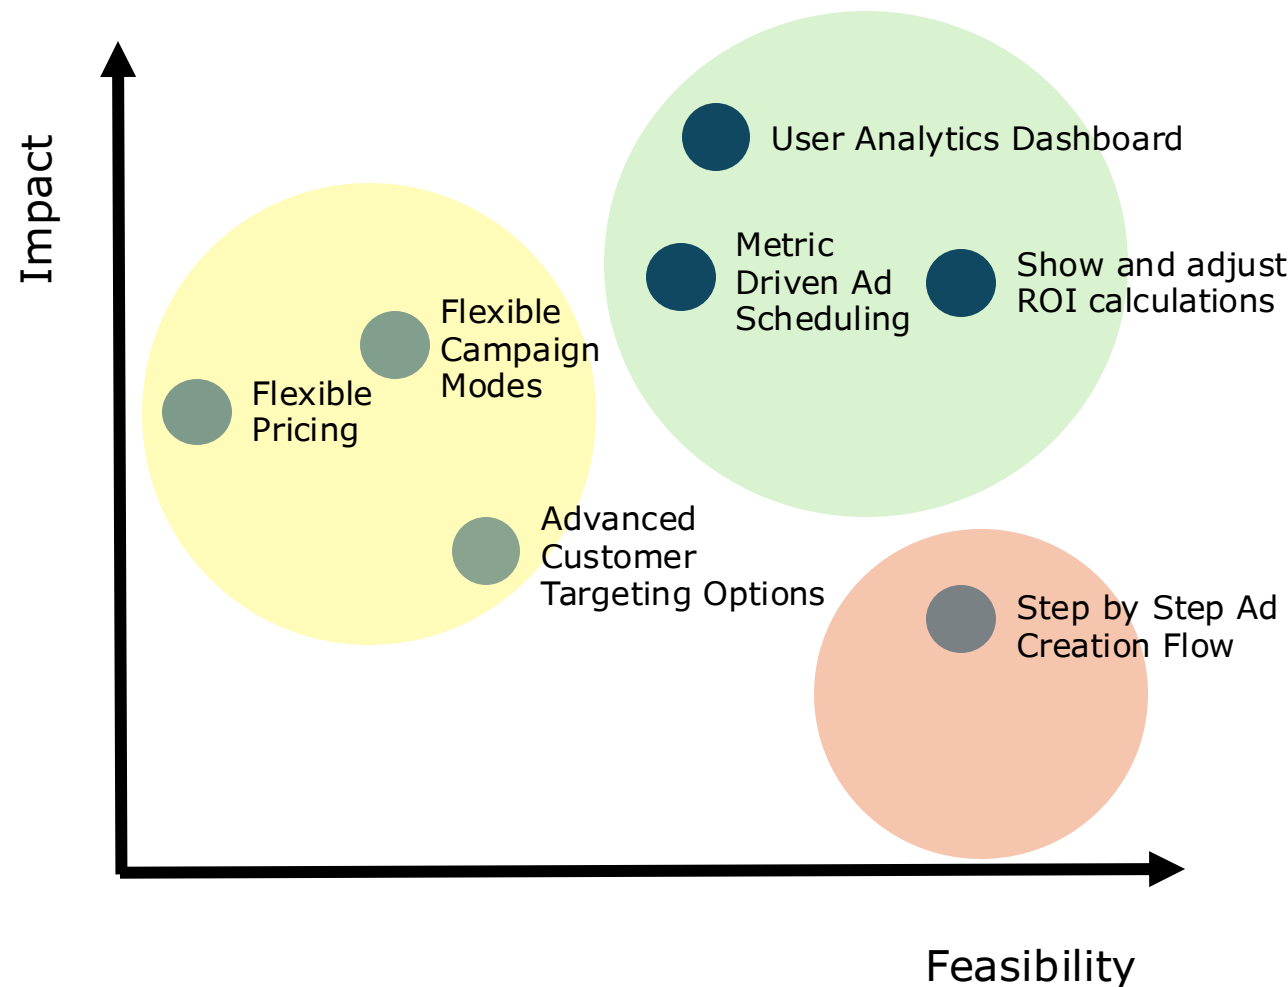

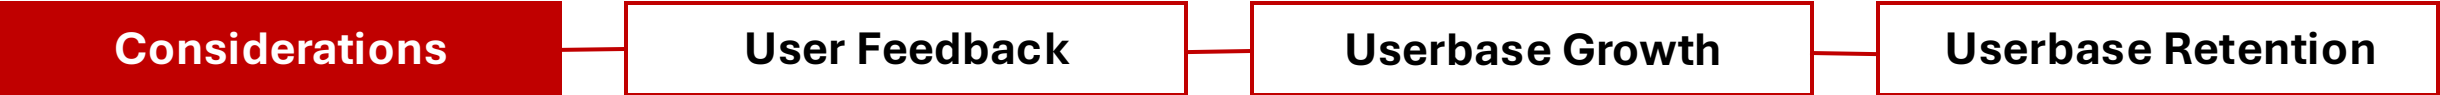

Display Demographics

Provide a detailed bar chart breakdown of all customers and the percentage of each category.

Prioritize adjusting ROI calculations & empowering users to make data driven decisions

Recommendation	Pain Point	User Feedback	Impact (low: 1~high: 5)	Feasibility (difficult: 1~easy: 5)	Score (2*I + F)	Priority (P0-P2)
Show/adjust ROI Calculations	1	71% of interviewees are skeptic towards ROI calculations and 93% are skeptics towards overall ROI	4	4	12	P0
Metric-driven Ad Scheduling	2	80% of interviewees liked advanced scheduling/heatmap controls	4	3	11	P0
User Analytics Dashboard	2	86% of interviewees think the current dashboard is insufficient in terms of analytics and/or clarity.	5	3	13	P0
Flexible Pricing (to include pay-per-conversion)	1	59% of interviewees preferred pay-per-conversion	3	2	8	P1
Flexible Campaign modes	2	54% of interviewees want choice or a more advanced set of features	3	2	8	P1
Advanced Customer Targeting Options	2	62% of interviewees wished for advanced targeting.	3	3* (based on information availability)	9	P1
Step-by-step Ad Creation Flow	3	General feedback about ease-of-use	1	4	6	P2

Prioritize adjusting ROI calculations & empowering users to make data driven decisions

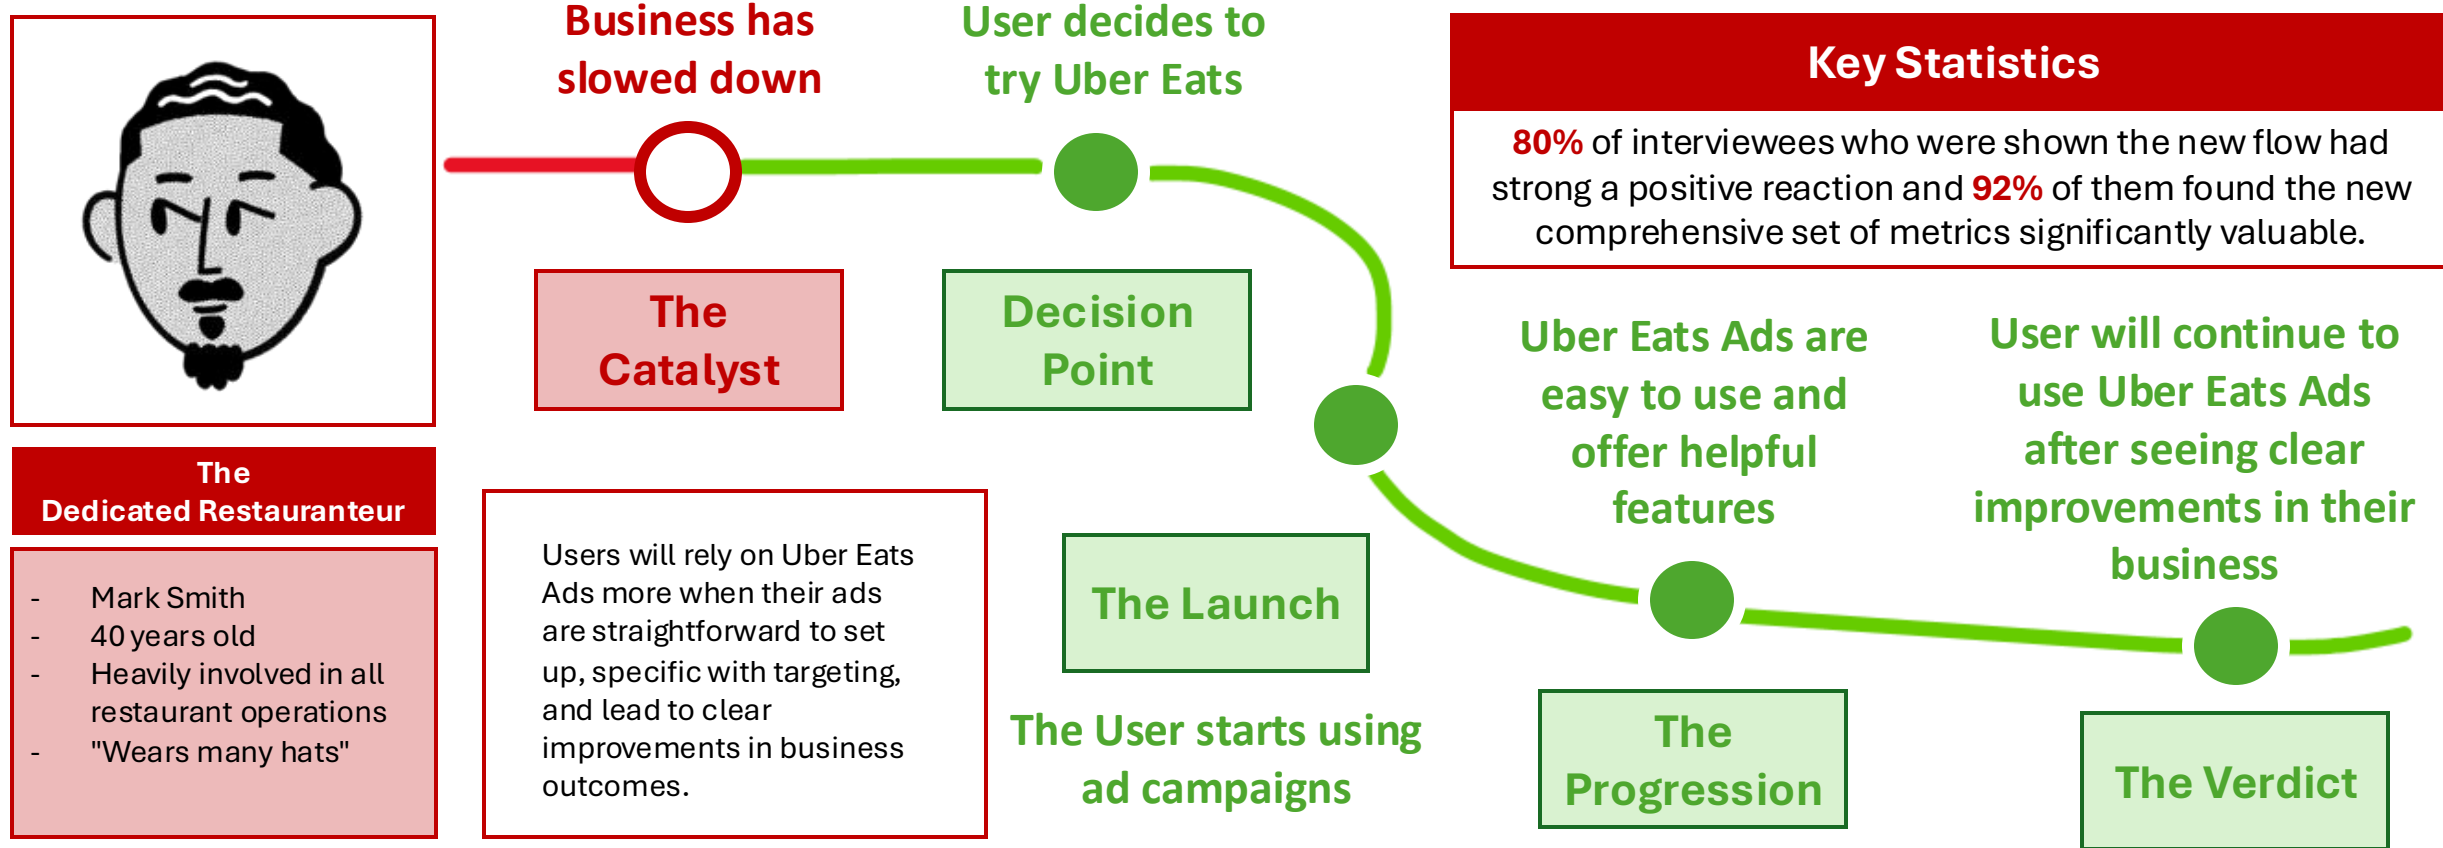

Legend

- P0** High impact and feasible to implement
- P1** High impact but difficult to implement
- P2** Easy to implement but lower impact

Uber Eats Ads will see an increase in userbase growth and retention by prioritizing clarity in ROI calculations and providing users with additional analytics to support their business growth. Flexibility and customization in campaign creation are also notable areas for improvement but may be less feasible to implement.

Dedicated restaurateurs turn to Uber Eats Ads when they start to see value, save effort, and reach the right customers.

Once Uber Eats Ads offers a clearer interpretation of metrics and provides more autonomy to users, churn stemming from lack of platform satisfaction and results will decrease and more restaurants will be inclined to buy ads. Clear metrics make owners more inclined to believe in the success that Uber Eats Ads brings, and an intuitive, controlled workflow make it a valuable investment for users.

Thank you! + Q&A

Special thanks to Kail for your continued support and valuable guidance throughout this project :)
